COMPANY OVERVIEW

Brio Solutions LLC is a specialized program and project management consulting firm providing Project Management Information Systems (PMIS), project controls, and executive reporting solutions for complex capital infrastructure programs. Established in 2018, Brio supports public agencies, utilities, and transportation owners in delivering capital programs with cost control, schedule certainty, and transparent governance. Our expertise is centered on implementing integrated, cloud-based construction management platforms that unify project management, document control, financial tracking, and reporting into a single system. We help agencies transition from manual, spreadsheet-driven processes to automated, scalable, and data-driven PMIS environments that improve efficiency, collaboration, and decision-making.

DIFFERENTIATORS

- Proven experience implementing enterprise PMIS platforms for public agencies
- Strong integration of project controls + technology systems
- Ability to replace Excel-based processes with automated reporting systems
- Expertise in Primavera, Unifier, Procore, EcoSys, & Power BI
- User-friendly, scalable, cloud-based solutions
- Local presence with responsive support and client-focused delivery
- AI-powered analytics and intelligent automation

CORE COMPETENCIES

Program & Project Management

- Capital program oversight
- Multi-project coordination
- Stakeholder collaboration

PMIS Implementation & Configuration

- System configuration and deployment
- Workflow automation
- Integration with enterprise systems

Project Controls

- Cost management and forecasting
- Schedule management (Primavera P6 / MS Project)
- Risk and change management

Executive Reporting & Analytics

- Power BI dashboards
- KPI tracking and performance metrics
- Automated reporting solutions

Document & Contract Management

- Document control systems
- RFI, submittal, and change order tracking
- Version control and audit tracking

Data Integration & Migration

- Legacy system migration
- API integrations
- Data validation and governance

AI Solutions

- AI agents & workflow automation
- RAG & intelligent search
- Data pipelines & real-time dashboards
