COMPANY OVERVIEW

Brio Solutions LLC is a specialized program and project management consulting firm providing Project Management Information Systems (PMIS), and program management services for utility infrastructure and capital improvement programs. Brio supports public agencies and utility owners in delivering complex capital programs with cost control, schedule reliability, and regulatory compliance. Our experience includes supporting transmission, distribution, water, wastewater, and energy infrastructure projects. We help utility clients improve performance by implementing integrated cost, schedule, and reporting systems, enabling real-time visibility into project delivery and program performance.

DIFFERENTIATORS

- Extensive experience supporting utility capital programs
- Strong integration of cost, schedule, and risk management
- Proven ability to support regulated infrastructure environments
- Expertise in Primavera P6, Power BI, EcoSys, and enterprise PMIS tools
- Ability to standardize processes across large, multi-project programs
- Focus on accurate forecasting and performance transparency
- AI-powered analytics and intelligent automation

CORE COMPETENCIES

Program & Project Management

- Capital program oversight
- Multi-project coordination
- Stakeholder collaboration

Utility Program Support

- Transmission and distribution projects
- Water and wastewater infrastructure
- Capital improvement program support

Project Controls

- Cost estimating and forecasting
- Planning and Schedule development
- EVM, Risk and Change management

PMIS and Reporting Systems

- PMIS implementation and configuration
- Dashboard development (Power BI)
- Automated reporting solutions

Document & Contract Management

- Document control systems
- RFI, submittal, and change order tracking
- Version control and audit tracking

Data Integration & Migration

- Legacy system migration
- API integrations
- Data validation and governance

AI Solutions

- AI agents & workflow automation
- RAG & intelligent search
- Data pipelines & real-time dashboards
